PROFESSIONAL SUMMARY

Finance professional with 3+ years of experience at UBS specializing in liquidity risk, fixed income products, and quantitative analytics. Quant student seeking opportunities in trading, market risk, and quantitative research.

EDUCATION

Imperial College London

London, UK | Aug 2025 – Aug 2026

MSc in Risk Management & Financial Engineering

Relevant modules: Fixed Income Securities, Systematic Trading Strategies with ML, Asset Allocation & Investment Strategies, Financial Engineering, Stochastic Calculus, Global Markets & Policy, Risk Management & Valuation, Empirical Finance

Savitribai Phule Pune University

Pune, India | Aug 2018 – Jun 2022

BTech Electronics and Telecommunication (CGPA 9.22)

PROFESSIONAL EXPERIENCE

UBS

Pune, India | Aug 2022 – Aug 2025

Financial Analyst (Authorized Officer)

- Managed reporting and risk oversight for a \$50bn+ structured products and debt issuance portfolio including ELNs, FX-linked, CLNs and CP/CDs, developing deep understanding of fixed income products, funding markets and structured payoffs.
- Engineered Python and Alteryx data pipelines automating large-scale trade-data processing and reporting, cutting turnaround 75% and recovering 120+ hours annually while strengthening data-quality and reconciliation controls
- Translated market moves and macro developments into funding, liquidity, and balance-sheet signals alongside Group Treasury and FRM, informing desk-level resource and positioning decisions
- Promoted to Authorized Officer (2024) after re-engineering EUC processes under FINMA requirements, delivering \$15mn in economic profit through controls and efficiency gains
- Executed debt portfolio migration testing from CS to UBS, safeguarding reporting accuracy and evaluating regulatory impacts on LCR, SLR, NSFR, and ALMM

UBS

Pune, India | Jan 2022 – Aug 2022

Intern

- Analysed \$50bn+ debt portfolio across global profit centres to assess impact on LCR, NSFR, and other liquidity reports

ACADEMIC PROJECT & RESEARCH

Imperial College London

London, UK | Aug 2025 – Aug 2026

Systematic Multi-Asset Trading Strategy — Equity, Energy & Metals Futures

- Developed a signal-filtering overlay for 11 futures, improving filtered Sharpe from 0.74 to 2.06 using Ledoit-Wolf shrinkage and bootstrap mean-variance allocation under a 10% risk budget.
- Diagnosed H1 2022 concept drift, identifying an inversion in equity signal profitability (75%→31% longs; 28%→81% shorts) and explaining strategy underperformance.
- Stress-tested strategy robustness via transaction-cost (2.06 Sharpe to break even at 10 bps) and turnover analysis, with ex-ante strategy specification to reduce backtest overfitting.

Interest Rate Term Structure Modelling

- Implemented short-rate models (Vasicek, CIR, Hull-White) and forward-rate (HJM) frameworks in Python to price bonds, caps, floors, and swaptions; calibrated to market yield curves and validated outputs to identify sensitivities relevant to funding cost estimation and FTP frameworks

ACHIEVEMENTS

Imperial College London

London, UK | Sep 2025 – Aug 2026

- Student Staff Committee (SSC) Career Lead, currently representing the career interests of 150+ students by actively bridging communication and driving alignment between the cohort and the Careers Team

ADDITIONAL SKILLS

Technical Skills

Machine Learning, VAR and XVA, GARCH modelling, Stress Testing, Back testing, SAP BO, Python (advanced), R (intermediate), SQL, Pandas (intermediate), Alteryx, C++, Monte Carlo Simulation, Bloomberg Terminal (intermediate), Financial Analysis, MS Office
